

Introducing mobile payment acceptance on your mobile phone or tablet...

Dealer Pay MOVES

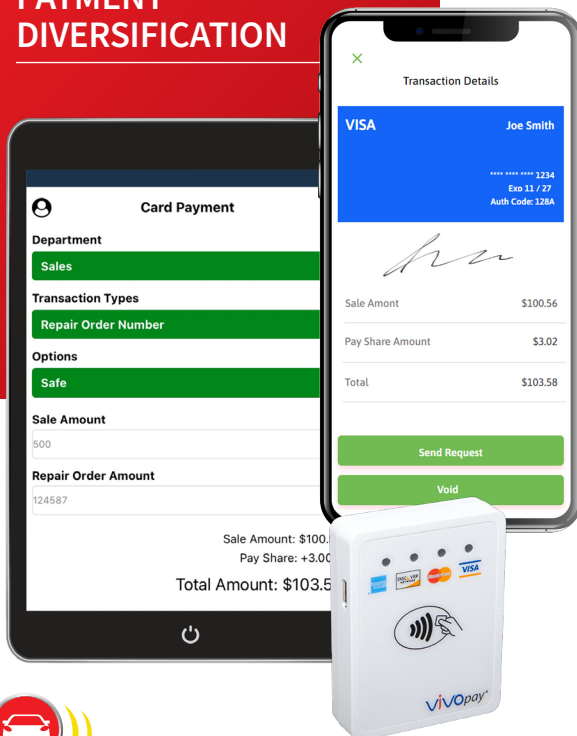

NEW MOBILE
FUNCTIONALITY

USER FRIENDLY
OPERATIONS

INCREASED
EFFICIENCIES

IMPROVED CUSTOMER
SATISFACTION

PAYMENT
DIVERSIFICATION

As dealers are recognizing the value of modernizing payment acceptance in each of their departments, both inside and outside of the dealership, being mobile has become a necessity.

Now in addition to all our other dealer-specific solutions, we now can provide mobile payment acceptance on your mobile phone or tablet, using **Dealer Pay MOVES**.

With **Dealer Pay MOVES**, users in each department can utilize our mobile application, available by IOS or Android, to capture both card present and card not present transactions.

Using the same user login for security, sales can be initiated in 3 different ways. First, using your phone or tablet, in combination with a 3-in-1, MagStripe, EWW Chip and NFC Contactless terminal. It can interface by USB, Bluetooth and AudioJack.

In addition, users can “key-enter” or scan an image to capture both Card or Check/ACH data directly into **Dealer Pay MOVES** secure app. Adhering to all of our same security measures, we will also perform address verification (AVS).

Dealer Pay MOVES can also initiate a Send Payment Request transaction by text (SMS) or email, allowing the customer to provide their own data or populate using their mobile wallet. Both options allow for text or email receipts, ability to capture digital signatures, as well as search and manage transactions.

Since all of the transactions flow through Dealer Pay’s Point-of-Sale solution, your dealership will continue to benefit from all of our payments and reporting functionality.

Set yourself apart from the competition by taking advantage of our complete line-up of services: Dealer Pay POS Plus with DMS, Pay Share and Moves.
